To Whom It May Concern

**Re: Territory Technology Solutions**

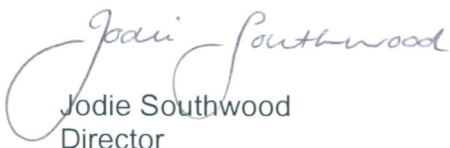

Territory Technology Solutions (TTS) was originally used by our company after an excellent referral from another company. This was after many years of engaging other IT companies who did not deliver the services we required.

The referral we initially received about TTS has certainly been justified. We have worked with TTS since 2002 and they have more than met our expectations.

TTS seek to ensure they have a genuine understanding of their clients requirements. They currently provide us with ASP solutions, network services, internet carriage and an array of other IT equipment sales, services, support and advice. Their workmanship/services have been found to be of the highest quality, and they have always displayed excellent attention to detail and completion of the services within a given time frame.

I have great pleasure in recommending Territory Technology Solutions as a quality IT specialist with an effective management and skilled team.

Yours sincerely

  
Jodie Southwood  
Director
